BISCLIPS® Tiger

Fixing Clip with Tiger Power

Multi-functional steel spring clip for beams

Walraven has now signalled a new phase for fixing technology on steel beams with the BISCLIPS® Tiger. The innovative steel spring clip for fast and safe assembly on steel beams truly grips to the beam with the power of a tiger. The multi-functional clamp even holds the heaviest loads securely. And the practical steel spring clip is assembled on the steel beam with only a single action.

The versatility of the BISCLIPS® Tiger is demonstrated by the connection options for the connection of S-hooks, metal cables, threaded rods and cable ties. Additionally, the innovative clip can also be used for fixing of cables, pipes and cable trays as well as for hooks and hanging on steel beams. The universal multi-talent is both suitable for horizontal as well as vertical application.

The BISCLIPS® Tiger can be fitted onto the beam quickly and easily beam – just fit it without tools, push it per hand onto the steel beam. The BISCLIPS® Tiger consists of tempered steel, with Magni® coating (corrosion resistant for 600 hours according to DIN 50021) and suitable for use in outdoor applications. The U-shape of the tiger guarantees optimal stability. Two parallel teeth provide non-slip holding. Both lower teeth are designed for different strengths.

The BISCLIPS® steel spring clip is available in sizes 2 - 8 mm, 8 - 16 mm and 16 - 24 mm for all beam thicknesses. The authorized load is 120 kg. The BISCLIPS® Tiger has a horizontal opening for cable ties to a width of up to 9 mm, a vertical opening for threaded bolts M8, binders, steel ropes and cable ties as well as a horizontal hole (diameter 6.7 mm) for S-hooks, cable or threaded rods. The threaded connection plates ICP for steel and wood screws of 4 - 5 mm are new. The edges of the Tiger have been rounded to prevent damaging the cables and ties.=Walraven/BfC=
