Walraven hammer-in plug

BIS GOLD® for plasterboard

Pre-drilling and spreading are no longer required

Walraven is one of the leading manufacturers of fixing systems, fire-protection and sanitary systems. The company slogan is BIS Technology by Walraven. BIS, that stands for Better Installation Systems. The new BIS GOLD® is the all-round hammer-in plug for plasterboard from 9 to 13 millimetres in thickness.

It has never been so quick and easy to fix screws into plasterboard. The BIS GOLD® is suitable for medium-weight applications, some light equipment and convectors. The serrated point makes hammering in as tremendously accurate as with the flat head.

The small fixing miracle, just 30 millimetres long, is manufactured from steel. The RayGold surface is galvanised and colour-passivated. The internal thread is central. In addition, the BIS GOLD® does not rotate on screwing so distortion in the wall is a thing of the past.

There is also no need for pre-drilling – position, hit, screw, finished. The plug expands by screwing in.

Disassembly, where required, causes only slight damage to the wall – a speciality of Walraven and innovative.

The hammer-in plug can accommodate wood screws with four to five millimetres diameter, which are at least 45 millimetres long. Horizontally, the BIS GOLD® is designed to take a load of 15 kilograms. Vertically, it manages 30 kilograms – the little thing is really quite strong. =Walraven/BfC=
