Walraven positioned throughout Europe

Production at six sites

Constantly high Quality

Walraven is one of the leading manufacturers of fixing systems, fire-protection and sanitary systems. The company slogan is BIS Technology by Walraven. BIS, stands for Better Installation Systems. The high-quality products are manufactured at six sites throughout Europe.

Whether it is clips, fixing rail, fire-protection systems or sanitary systems – six production sites throughout Europe provide a constantly high quality for the Walraven products. These sites are located in the Netherlands, Great Britain, Germany, the Czech Republic and Turkey.

At the headquarters of the Walraven Group in Mijdrecht, state-of-the-art machinery is used. Metal and plastic clamps are mass-produced here in highly-automated pressing plants. Rails and cantilever arms are also formed in mass quantities here on their own assembly line. In addition, the engineers are based in the Netherlands, overseeing pipe solutions for individual products, the Walraven Special Pipe Support.

In the British town of Banbury, at Walraven Ltd., spring steel clips are assembled and packaged in a semi-automated plant. As well as this, the employees produce fire-protection sleeves and cold blocks.

In the German town of Ehrenhain, at Walraven Ehrenhain GmbH, metal clamps are produced in medium quantities from an automated pressing plant.

The Czech employees in Horka/Cista at Suchanek & Walraven s.r.o. do the same job on a smaller scale. However, this is also where the metal frames are welded for the front wall systems. They are assembled and packaged in large quantities. At a second site there, at SWO Tooling s.r.o., pressing and stamping tools are produced.

Finally, the Turkish town of Istanbul is the headquarters of Jefleks Plastic Kaucuk, which produces rubber profiles and processes rubber and metal in a semi-automated plant. =Walraven/BfC=
