Walraven presents:

Super Pipe Clamps

starQuick® holds with one Click!

With a super pipe clamp, Walraven is revolutionising the European market. With a single click, the starQuick® pipe clamp holds all pipes in heating, sanitary and electrical installations more quickly, easily and advanced than conventional pipe clamps can manage.

This innovative pipe clamp generation does not require locking screws. Gentle pressing of the pipe into the clamp is enough: the two halves of the clamp clip around the pipe. With a quiet "click!", it closes and will now resist any pressure in any direction.

The pipe is completely surrounded by the clamp. Two locking positions enable a large clamping range for any starQuick® pipe clamp. The first locking position provides gliding pipe fixation. The second locking position is for clamping pipe fixation.

The plastic material of the clamps, resistant to aging and chemical influences, is excellent for use in outdoor applications and the food industry.

There are a number of options available to assemble the starQuick® clamps: directly hammer in screws, push plugs, duo-wall plates or rail systems. starQuick® pipe clamps are available in 13 sizes to suit pipes between ten and 65 millimetres in diameter. =Walraven/BfC=
