Exclusively Designed for Installation Professionals

Pre-wall by Walraven

Unique Detail Solutions

When one of the leading manufacturers of rail fixing systems in sanitary technology focuses on developing a pre-wall system, this is guaranteed to be adapted to the requirements of installation professionals. Walraven, the specialist in rail fixing systems therefore exclusively designed its BISMAT® series with needs of installation professionals in mind. The result is a product series that is distinguished by unique detail solutions.

The BISMAT® assembly components are totally pre-assembled. That includes wall attachments and fixing materials for walls and floors. With unlimited adjustable functions, all modules are self-supporting and can carry a maximum load of up to 400 kilogrammes. Soundproofing certification is also a standard feature.

Walraven has adapted all modules to the needs of the installation specialist. On request, a number of components can also be pre-fabricated.

The BISMAT® series provides a complete range – from the basic module to the WC module as a corner solution. In addition, there is a unique 3D magnet bathroom planning kit for three-dimensional planning on site with the customer. =Walraven/BfC=
