World Premiere from Walraven:

Individual Toilet System

VariClo® height-adjustable, before and after installation

Walraven introduces the world premiere of the uniquely named VariClo® toilet system specially designed for people with physical disabilities. The unique feature of this system is the height-adjustability – both before and after installation!

Walraven has embraced the idea of comfort at any age and set the standard in pre-wall technology. The company slogan is BIS Technology by Walraven. BIS stands for Better Installation Systems. The claim to offer better installation systems is ideally demonstrated with this new model.

Every user of the VariClo® can adjust the seat height for personal comfort. Adjustability functions are possible even when the system is in use and can also act as a seating aid and standing support. With its easy-to-use operation, the VariClo® is also the right system for public buildings, offices, care centres and hospitals.

The VariClo® exclusively uses the wall-hung toilet system so the space beneath and behind the toilet is easy to keep clean.

The VariClo® is available in three models. The basic model VariClo® Comfort offers a manually adjustable function of up to ten centimetres. The VariClo® Comfort Extra can be height-adjusted up to 30 centimetres and can be fixed in any desired position.

Armrests can also be fitted that can be automatically adapted to the respective height. Finally, the VariClo® Comfort DeLuxe model is automated so individual heights can be adjusted at the touch of a button.

The VariClo® models are based on the building block system which means that the basic Comfort model can simply be converted later, and without any breaking work to the electric Comfort DeLuxe model.

The VariClo® models have been tested to withstand loads of 400 kilogrammes. The installation dimensions of 690 x 1.295 x 230 mm conform to required standards. This means that the VariClo® is suitable for integration in commercially available pre-wall installation systems.

The VariClo® is supplied pre-assembled, including the Geberit cistern, drain set, fixing material, assembly instructions and user manual. Walraven also offers an armrest set made out of high-grade stainless steel, an automated operation unit as well as contactless infra-red flushing. =Walraven/BfC=
