

## ENVIRONMENTAL POLICY STATEMENT

Walraven Ltd manufactures and supplies a wide range of electrical and mechanical fixings, fire protection systems and sanitary systems used by installers across the world.

The Walraven Group are a family company so long-term thinking comes naturally. We are driven to take responsibility and make a sustainable difference from a human, economic and environmental point of view. We are determined to meet today's requirements without compromising the needs of tomorrow.

We are aware of and adhere to all applicable legislation, will continuously monitor, and implement any necessary standards, frameworks, and regulations as they evolve, and are committed to exacting an equilibrium between financially sound results and serving social and environment goals for all our stakeholders.

Walraven Ltd recognise that in our day-to-day operations we inevitably impact on the environment in several ways and are committed to reduce that impact through continual improvement in our environmental performance. To achieve this, we:

- Establish, implement, and maintain an Environmental Management System (EMS) to meet the requirements of ISO 14001:2015.
- Are committed to the protection of the environment including prevention of pollution.
- Employ systems and procedures that ensure fulfilment of our environmental compliance obligations.
- Put controls in place to protect the environment from any significant environmental aspects and impacts arising from our work activities.
- Minimise the environmental impact, for the life cycle (including disposal), of plant, equipment, and any other physical assets under our control.
- Provide employee training to enhance environmental awareness of our employees, to ensure environmental issues are considered when managing our premises and planning, implementing, and undertaking all projects.
- Promote a sustainable approach to business, in partnership with our clients and other stakeholders by conserving energy, minimising consumption, preferring low pollution materials, maximising efficiency, and implementing the Waste Hierarchy.
- Ensure that we integrate sustainability considerations into our wider business strategy and decision making.
- Are committed to continual improvement in our environmental performance, through the implementation of our EMS, and the establishment of measurable environmental objectives and targets. These will be monitored and reviewed to evaluate the effectiveness of this environmental policy.
- Are committed to achieving Carbon 'Net Zero' by 2050 and actively take steps to reduce our emissions as well as supporting the UK's transition towards a net-zero economy.

This Environmental Policy Statement and the responsibilities and arrangements that support it will be reviewed at least annually or more frequently where there have been significant changes to the company or the nature of the company's activities.
